### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brackenridge US 3959387 taken with Boswell et al US 4020112 and Forster et al US 4194054.

Brackenridge teaches brominated biphenylethers which contain a fluorine substituent. See, for example, column 3 lines 27+ and column 2 lines 44+ particularly line 55. it is also noted the degree of bromination is a function of the amount of fire retardance required. The claimed hexabromo compounds would have been obvious to one of ordinary skill in the art in light of these teachings. Particularly in further view of Boswell et al and Forster et al. See, respectively, column 1 column 10 and column 16, and, column 1 lines 10-18 where R is arlyoxy with at least one halogen.

Applicants' comments have been noted and considered but are not deemed persuasive of patentability. Regarding the selection of halogen substituents it is additionally noted that the claims are drawn to compounds notwithstanding applicants' intended use. Further, the congeneric substitution of one halogen substituent for another on analogous compounds in view of the art as a whole would have been obvious to one of ordinary skill in the art.

No claim is allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
